GummySearch | Reddit Audience Research

How GummySearch works Find all the relevant communities where your target audience hangs out online. This is where they talk about their point of view, complain about their problems, and asks for recommendations from their peers. Each community is a microcosm of its own, with its own rituals, terminology, and personality.

Social Listening for Startups

Social listening is the process of monitoring particular keywords online in order to find out what people are saying about your product, market, and competitors. It is also a method of marketing that allows you to "be in the right place at the right time" and contribute to the conversation in order to promote your business.
